

containing 2 to 6 carbon atoms, alkynyl groups containing 2 to 6 carbon atoms and groups of formula II:

in which R_9 and R_{10} , which are the same or different are selected from the group consisting of H, halo and alkoxy groups containing 1 to 3 carbon atoms; in which R_2 is selected from the group consisting of H and alkyl groups containing 1 to 3 carbon atoms; in which R_3 and R_4 , which are the same or different are selected from the group consisting of H, straight or branched chain alkyl groups containing 1 to 4 carbon atoms, alkenyl groups having 3 to 6 carbon atoms, alkynyl groups having 3 to 6 carbon atoms, cycloalkyl groups in which the ring contains 3 to 7 carbon atoms, and a group of formula CHO or R_3 and R_4 together with the nitrogen atom form an optionally substituted heterocyclic ring having 5 or 6 atoms in the ring optionally containing further heteroatoms in addition to the nitrogen atom; in which R_5 and R_6 , which are the same or different are selected from the group consisting of H, halo, trifluoromethyl, alkyl groups containing 1 to 3 carbon atoms, alkoxy groups containing 1 to 3 carbon atoms, alkylthio groups containing 1 to 3 carbon atoms and phenyl or R_5 and R_6 , together with the carbon atoms to which they are attached, form a second benzene ring optionally substituted by at least one halo, alkyl or alkoxy group containing 1 to 4 carbon atoms or the substituents of the second benzene ring together with the two carbon atoms to which they are attached form a further benzene

~~ring[, and their pharmaceutically acceptable salts]~~

Claim 2 (2x amended). A [C]compound of formula I [as claimed in] according to claim 1 in which R₁ is [selected from the group consisting of straight or] branched chain alkyl [groups containing 3 to] of up to 4 carbon atoms, cycloalkyl groups containing 3 to 7 carbon atoms, cycloalkylmethyl groups in which the cycloalkyl ring contains 3 to 6 carbon atoms [and] or a group[s] of the formula II:

*C
Sub
C'*
in which R₉ and R₁₀ are selected from the group consisting of H, fluoro [or] and methoxy and [in which] R₂ is H or methyl.

Claim 3 (2x amended). A [C]compuond of formula I [as claimed in] according to claim 2 in which R₁ is [selected from the group consisting of propyl,] isopropyl, [butyl,] isobutyl, secondary butyl, cyclopropyl, cyclobutyl, cyclopentyl, cyclohexyl, cycloheptyl, cyclopropylmethyl, cyclobutylmethyl, cyclopentylmethyl, cyclohexylmethyl and phenyl, R₃ and R₄ are selected from the group consisting of H, methyl, ethyl and formyl, or R₃ and R₄ together with the nitrogen atom to which they are attached form a heterocyclic ring containing one nitrogen atom and 4 or 5 carbon atoms which is optionally substituted by one or more alkyl groups or R₃ and R₄ together with the nitrogen atom to which they are attached form a heterocyclic ring containing a second nitrogen atom which is optionally alkylated or a heterocyclic ring including one or more double bonds and R₅ and R₆ are selected from

C
the group consisting of H, fluoro, chloro, bromo, iodo, trifluoromethyl, methyl, methoxy and phenyl or R₅ and R₆ together with the carbon atoms to which they are attached form a second benzene ring optionally substituted by halo.

Kindly cancel claims 4-6.

Claim 7 (2x amended). A [C]compound according to claim 1 of the formula III:

C
or a pharmaceutically acceptable salt thereof in which R₁ is selected from the group consisting of straight or branched chain alkyl [groups containing 3 to] of up to 6 carbon atoms, cycloalkyl groups containing 3 to 7 carbon atoms, cycloalkylalkyl groups in which the cycloalkyl group contains 3 to 6 carbon atoms and the alkyl group contains 1 to 3 carbon atoms, alkenyl groups containing 2 to 6 carbon atoms, alkynyl groups containing 2 to 6 carbon atoms and groups of formula II:

in which R₉ and R₁₀, which re the same or different are selected from the group consisting of H, halo and alkoxy groups containing 1 to 3 carbon atoms; in which R₂ is selected from the group consisting of H and alkyl groups containing 1 to 3 carbon atoms;

Cn
Sch
GW

in which R_3 and R_4 , which are the same or different are selected from the group consisting of H, straight or branched chain alkyl groups containing 1 to 4 carbon atoms, alkenyl groups having 3 to 6 carbon atoms, alkynyl groups having 3 to 6 carbon atoms, cycloalkyl groups in which the ring contains 3 to 7 carbon atoms, and a group of formula CHO or R_3 and R_4 together with the nitrogen atom form an optionally substituted heterocyclic ring having 5 or 6 atoms in the ring optionally containing further heteroatoms in addition to the nitrogen atom; in which R_5 and R_6 , which are the same or different are selected from the group consisting of H, halo, trifluoromethyl, alkyl groups containing 1 to 3 carbon atoms, alkoxy groups containing 1 to 3 carbon atoms, alkylthio groups containing 1 to 3 carbon atoms and phenyl or R_5 and R_6 , together with the carbon atoms to which they are attached, form a second benzene ring optionally substituted by at least one halo, alkyl or alkoxy group containing 1 to 4 carbon atoms or the substituents of the second benzene ring together with the two carbon atoms to which they are attached form a further benzene ring[; and their pharmaceutically acceptable salts].

Claim 8 (2x amended). A [C]compound [of formula III as claimed in] according to claim 7 in which R_1 is [selected from the group consisting of straight or] branched chain alkyl [groups containing 3 to] of up to 4 carbon atoms, cycloalkyl groups containing 3 to 7 carbon atoms, cycloalkylmethyl groups in which the cycloalkyl ring contains 3 to 6 carbon atoms [and] or a group[s] of the formula II:

in which R_9 and R_{10} are selected from the group consisting of H, fluoro [or] and methoxy and [in which] R_2 is H or methyl.

Selvin C2
Claim 9 (2x amended). A [C]compound [of formula III as claimed in] according to claim 7 in which R_1 is [selected from the group consisting of propyl,] isopropyl, [butyl,] isobutyl, secondary butyl, cyclopropyl, cyclobutyl, cyclopentyl, cyclohexyl, cycloheptyl, cyclopropylmethyl, cyclobutylmethyl, cyclopentylmethyl, cyclohexylmethyl and phenyl, R_3 and R_4 are selected from the group consisting of H, methyl, ethyl and formyl, or R_3 and R_4 together with the nitrogen atom to which they are attached form a heterocyclic ring containing one nitrogen atom and 4 or 5 carbon atoms which is optionally substituted by one or more alkyl groups or R_3 and R_4 together with the nitrogen atom to which they are attached form a heterocyclic ring containing a second nitrogen atom which is optionally alkylated or a heterocyclic ring including one or more double bonds and R_5 and R_6 are selected from the group consisting of H, fluoro, chloro, bromo, iodo, trifluoromethyl, methyl, methoxy and phenyl or R_5 and R_6 together with the carbon atoms to which they are attached form a second benzene ring optionally substituted by halo.

Kindly cancel claims 10-12.

July 6

in which R_9 and R_{10} , which are the same or different are selected from the group consisting of H, halo and alkoxy groups containing 1 to 3 carbon atoms; in which R_2 is selected from the group consisting of H and alkyl groups containing 1 to 3 carbon atoms; in which R_3 and R_4 , which are the same or different are selected from the group consisting of H, straight or branched chain alkyl groups containing 1 to 4 carbon atoms, alkenyl groups having 3 to 6 carbon atoms, alkynyl groups having 3 to 6 carbon atoms, cycloalkyl groups in which the ring contains 3 to 7 carbon atoms, and a group of formula CHO or R_3 and R_4 together with the nitrogen atom form an optionally substituted heterocyclic ring having 5 or 6 atoms in the ring optionally containing further heteroatoms in addition to the nitrogen atom; in which R_5 is H, halo, trifluoromethyl, alkyl groups containing 1 to 3 carbon atoms, alkoxy groups containing 1 to 3 carbon atoms, alkylthio groups containing 1 to 3 carbon atoms or phenyl and R_6 is fluoro or methyl.

Claim 77. A method according to claim 76 in which R_1 is isopropyl, isobutyl, secondary butyl, cyclopropyl, cyclobutyl, cyclopentyl, cyclohexyl, cycloheptyl, cyclopropylmethyl, cyclobutylmethyl, cyclopentylmethyl, cyclohexylmethyl or a group of the formula II:

II

in which R_9 and R_{10} are selected from the group consisting of H,

Marked
fluoro and methyl, R_2 is H or methyl, R_3 and R_4 are selected from the group consisting of H, methyl, ethyl and formyl, or R_3 and R_4 together with the nitrogen atom to which they are attached form a heterocyclic ring containing one nitrogen atom and 4 or 5 carbon atoms which is optionally substituted by one or more alkyl groups or R_3 and R_4 together with the nitrogen atom to which they are attached form a heterocyclic ring containing a second nitrogen atom which is optionally alkylated or a heterocyclic ring including one or more double bonds, R_5 is H, fluoro, chloro, bromo, iodo, trifluoromethyl, methyl, methoxy or phenyl and R_6 is fluoro or methyl.

34 29
Claim 78. A method according to claim 73 wherein the compound is of the formula III:

E or a pharmaceutically acceptable salt thereof in which R_1 is isobutyl ~~or phenyl~~; R_2 is H; R_3 is H, methyl or ethyl; R_4 is H, methyl or ethyl; R_5 is chloro; and R_6 is H or chloro.

Claim 79. A method according to claim 78 wherein the compound is 1-[1-(4-chlorophenyl)cyclobutyl]butylamine or a pharmaceutically acceptable salt thereof.

Claim 80. A method according to claim 78 wherein the compound is N,N-dimethyl-1-[1-(4-chlorophenyl)cyclobutyl]-butylamine or a pharmaceutically acceptable salt thereof.

Claim 81. A method according to claim 78 wherein the compound is N-methyl-1-[1-(4-dichlorophenyl)cyclobutyl]-
